Abracock. (See Peachidem.)

Acatia.

ACatia stoppeth the Laske, and the termes, and setteth the lose matrix in the naturall place being drunke with red wine. 2 It is good to be laid to serpigo or wilde fire, all inflamations and hote tumours, wheales, and hote blisters of the mouth, and with eye medicines to heale inflamations, blastings and swellings of the eyes being applyed. 3 It maketh the haire blacke being often washed with the water wherein it hath béene soked: The leaues and tender crops of Acatia do settle and strengthen members that are out of ioynt, if they be bathed in a hote bath, or stew made with the broth thereof. 4 Being ground with vineger, it abateth the pusches of the leprsy. (See Sloes.) 5 In plasters it helpeth swellings, and humours in the eyes wonderfully, drinke it for the flixe, séethe it in the water of decoction of Pomegranates, or in vineger, and drink it to kill wormes. 6 Use it in a pessary to stop the flowers, to stop fluxes, vse fubfumigations therof, or els drink it. See distilling vse Acatia. 7 It helpeth the holy fire, apostumes and wounds of the eyes, it stoppeth the termes, it healeth créeping sores, the falling of the matrix, it stayeth vomiting, and strengtheneth the stomake, and ceaseth paine. (See Sloes.)

Acorus, or Gladen.

DRinke halfe a spoonfull of the powder of the Root with white wine, and vse it as much in thy pottage to heale the vlcerate and hardnesse of the side. 2 Stamp the root and streine it with some Rew and Mints in Ale, and make pottets therewith, and drinke the ale of them to expell vrine. 3 The broth of the root procureth vrine, is good for the paines of the side, liuer and breast, the gnawing of the guts, drawings together or burstings, and for womens griefes as Iris is, it wasteth away the milte, and helpeth the strangurie, and the bitings of serpents. 4 Drink a scruple of the root against all inward bruises with foure ounces of honied wine. The root is much vsed among preseruatiues and Treacles. 5 The broth is good against the swellings of the stones, and all hardnesse and gathering of humours being sodden in wine and laid to. 6 The iuice driueth away the darknesse of the eyes. 7 The root punned with a little Verdigreice, a little of the root of great Centorie and a little hony, draweth forth all kindes of thornes, splints, and broken bones. 8 The root mixt with vineger and applyed, doth consume and waste cold tumours and swellings. 9 The iuice rubbed on the place, driueth away and killeth the stinking wormes, and mothes called Cimici. 10 Halfe a dram of the seed taken with vineger wasteth and cureth the hardnesse of the milt. 11 For the griefes of the liuer and milte, bruise one pound of Acorus, and keepe it three dayes in vineger, then seethe it to the one halfe, then streine it, and put hony to it, and seethe it againe till the vineger be consumed and take of this Oximel daily in the morning with the decoction of Acorus. 12 If any beare Acorus about them, they shall not haue the bloudy flixe, nor the crampe. 13 Seethe Acorus in water & vse for the plurisie, the griefes of the chest or brest, and of the liuer or milte, the strangurie and painefull making of water.

water. 14 Stampe the root and sethe it in water to the third part, and drinke thereof three dayes, it doth wonderfully bring forth the urine, and healeth the strangurie.

Note that the same root or herbe is not to be vsed in Agues. Calamus Aromaticus, or the root of Asarabacca may supply the want of it. (See in their places.)

15 For the stitch in the side, drink pouder of it with a draught of Malmesie. 16 Tooth ache apply a piece of the root to the tooth that aketh. 17 For venom or poyson drunke, stampe Gladen that groweth on high ground, and Dragons, and drinke it with wine. 18 To dry vp wounds and to heale them vp with cleane flesh, although the bone be bare, apply powder of the root with hony. 19 For the dropsie in the belly and feet, & to kill wormes, stamp a good quantity of the root & streine it in white wine and drinke it. 20 Flixe to stop, sethe brample berries in water of the decoction thereof and vse it, but if thou haue an ache, bathe in the decoction of it, or wipe thee ouer with cloth wetted therein. 21 Jaundies, bath in the decoction of Gladen and Ciclamen, or stampe them, and drinke them with water, and couer thee to sweat. 22 Flowers to cause, make a pessary of the root, and anoint it with oyle de Bay, or common oyle, and cast thereon powder of Wallwort, and put it in all night till it prouoke it to bleed. 23 Pricks and bones to draw out, stampe the root and apply it. 24 Drinke it to heale bruisings. 25 Boyle it in water or ale, and streine it with hony, and boyle it againe, and scum it, and drinke it warme in the mornings two houres before meat to purge watrish humours, and for the dropsie. 26 The conserue thereof made with the pappe of the roots, two or three times so much hony, or rather sugar, comforteth the stomacke, and nourisheth and looseth tough flegme downwards maruellously, and is good for the sickneese of the braine, and sinews, and all diseases coming of flegme, and openeth the naturall course and the termes. 27 Stamp the root of Gladen, and drinke it with stale Ale, and the iuice of Fumiterie morning and euening fifteene dayes, and vse this ointment therewith, stampe mayles, and Red dock roots, and boyle them with Barrowes greace, and put thereto brimstone and Mercurie ana, and anoint any skab therewith, and hee whole, though it be of seuen yeares continuance.

28 To bring downe the flowers ſæthe Gladen roots in ſtrong vineger or wine and receiue vp the fume thereof into the matrix cloſely, &c. it neuer faileth, and therefore beware that you be not with childe. 29 Face euill coloured diſtill the roots of Acorus, and of Turnips in a limbeck, and drinke thereof fiue ounces before meat fifténe dayes. 30 Stingings of ſerpents, apply powder of the vpper parts with wine. 31 To diſſolue impoſtumes vnder the eare, boyle the roots and ſtamp them with ſalt, and apply them. 32 Belly bound, drinke the iuice with the yolke of an egge hote as may be ſuffered. 33 Pilt griefes, drink it with wine, ſight to cleare put in the iuice.

Adders tongue.

ADders tongue, ſtampe it with Swines greaſe, and apply it to all ſwellings, inflamations, ringwormes, and chingles, and to heale all wounds and cuts with ſpéd. 2 It is ſingular good to heale wounds both inward and outward, and for all burſtings

stings and ruptures being sodden in wine and drunke. 2 Seeth it in water, and drink it against all hot feuers, inflamations of the liuer, and all inward and outward heats. 3 Stampe it with swines grease, and vse it to all burning and spreading sores, hote swellings and impostumes, and the holy fire. 4 Apply it to a wound either greene or drie to heale it spedily, drinke the decoction of it to heale all inward wounds and all other griefes. Apply it to the new ruptures of children, and binde it hard with a trusse. 5 Seeth it with Sallet oyle while it is greene, and so it helpeth both swellings and sores, wounds, &c. 6 Being wrapt in Virgins ware, and put into the left eare of a horse, it causeth him to fall as if he were dead, but being taken out, he riseth againe.

Agnus castus.

AGnus castus is a singular good remedy for all such as would liue chaste: for it withstandeth all filthie desire to lechery, it driueth vp the seed of generation, whether it be taken in powder or decoction, or that the leaues be strawed in the bed to sleepe vpon, and therefore is called chaste, cleane, or pure. 2 The seed drunk dissolueth all windinesse in the stomake, intralls, bowels, and matrix, and all other parts of the body, and openeth and cureth all hardnesse and stopping of the liuer and milte, and is good in the beginnings of dropsies, one ounce being drunk with wine. 3 Taken by it selfe, or with Penerotall, it prouoketh termes, and so it doeth, put in as a pessarie. 4 Some mixe it with oyles and ointments that are made to heate, mollifie, and heale the hard and stiffe members that are waxen dead, sleepie, benommed, or wearied, it cureth also the clefts and chops of the fundament and great gut being laid to with water. 5 Agnus castus driueth all vene-

mous beasts from where it is scattered or burned. 6 It healeth all venemous bitings being applyed, or the séed thereof drunke. 7 It helpeth hardnesse, stoppings, apostumations, and vlcers of the matrix, if women sit in the decoction or broth thereof. 8 The leaues with butter do dissolue the swellings of the coddes being applyed. 9 A branch or rod thereof carried in the hand, defendeth the bearer from chasing and wearinesse. 10 The séed drunke increaseth milke. 11 With vineger and oyle, it is good for the frensie and letargie. 12 The leaues sodden in wine and honie, heale the vlcers and sores of the mouth and gummes. 13 For satyriasis or standing of the yard, eat the séeds thereof, or séethe it in wine, and plaster it to the reines and secret parts. 14 Agnus castus sodden in vineger with Fenell, is good against the dropsie. 15 Sodden in salt water with Sage and Smallage, and the hinder part of the head washed therewith, helpeth the letargie. 16 Being either drunke or carried about one, it taketh away lust. 17 A plaister thereof applyed, helpeth the head ache that cometh of euill humours. ¶ Alecost, Costmary, or Maudlinwort.

ALecost, Costmary, or Maudlinwort, either alone or with Persnipséeds boyled in wine and drunke, cureth the grypings and torments of the belly or guts, and the stire. 2 The conserue of the leaues made with sugar, doth warme and dry the braine, and open the stopping thereof, and helpeth reumes & distillations taken in quantitie of a beane. 3 Vsed in meates, as Sage,

Sage and other hearbes, especially in sallads and sawses (for the which it is excellent) it yeldeth a proper sent or taste: Alecost and Maudlin be of equall vertues, they comfort the stomake. 4 The iuice drunke killeth wormes both small and great: it is good for the cold mother, it strengtheneth ỹ stomake whether it be drunke or applyed, and stayeth vomiting. 5 The herbe strawed or burned driueth away serpents, and is good against their poysons. 6 Being sodden in wine and drunke, it is good for them that haue drunke Opium, or other venemous things, and for biting of serpents, especially one dramme of the powder of the rot thereof taken in wine, with the like weight of the seeds of wilde Persnips. 7 It hath the nature of Feuerfue in all things, and it is good for women to sit in the decoction thereof to prouoke sweat, and to draw downe the termes, and auoid the paine that cometh by retention of them. 8 The same stamped and applyed taketh away hardnesse and swelling in any place. 9 The flowers of Maudlinwort sodden and drunke, killeth great wormes in the belly, causeth sweat, and openeth the obstructions of the liuer, milte, kidneis, and bladder. Fluxes, apply plasters of sower Apples to the reines and nauill. Feuers continuall, vse bitter sweets. 7 Bloudy flixe, roste as much waxe as a beane in an Apple, and eat it. Sethe Apples to pap, and to vi. ℥ of it, put viii. ℥ of hony, and sethe to perfection and vse it. 8 Eyes heate and running, cut off the paring thicke and apply the inside to bedward to help it spedily. Cough, roste Butter, English Saffron, and as much Sugar candie as a Nutmeg in a great Apple, and eat such a one morning and euening. 9 Eyes to comfort, distill a peck of rotten Apples, and vse the water. Roste iii. or iiii. graines of Olibanum in a well smelling Apple on the embers, and eat it to breake the impostume of the pluriſie, or any other with speed. 10 Sethe the inward yellow barke with wood, bone, or horne, with Alom to colour it yellow. Face and nose red, distill the blomes in Balneo Mariæ, and wash with the water morning and euening daily. Distill it when it is full blowen. 11 To ripen an apostume, roste an Apple in the embers, and mixe it with butter and hony, or the yolke of an egge sodden, and apply it. 12 For griefes of the breast and breast bone, take out the core of a ripe Apple, and fill it with powder of Licoras, & Galingale, or Cinamom and Hony, all well mixed together, and roste it and pill it and eat it as oft as need is. For the chincough and other like, and for paine in the breast, roste sallet oyle in a great Apple in the embers, and apply it hot on the breast as often as need is. Liuer hot, sethe the iuice of Apples both sower and sweet, with almost twise so much sugar into a syrupe, and take a little of it fasting daily with luke warme water. 13 Apples do cole and comfort the stomake, especially such as are sowrish, & astringent of taste. 14 And they may be vsed in hote Agues, and other heats of the stomacke against thirst, but otherwayes hurtfull to the stomacke, causing windinesse and blastings in the belly. 15 Sowre Apples boyled and eaten cold after meat, loosen the belly gently. Apples eaten before meat, do nourish very little, because they be watrish. 16 The leaues are good to be applyed to hote tumors and apostumations in the beginning, and to wounds to keepe them from euill heate and swelling. The leaues, flowers, and buds of euery

Apple-tree, but especially of the Quince-tree, do stop and binde. 17 The tart and sowre Apples do binde, but the ripe Apples are of a cõtrary. They that are taken at the spring ingender choller, hurt all the synows, and breed inflammations and hot burnings. 18 All Apples hurt the synows, the unripe are very noisome, if a man eat, so that he fill himselfe with Apples, they ingender the stone. 19 But they are good for them that swone, and haue a weake heart. The pap of an Apple with Rose water applied to the eyes, doth quench their burning, and taketh away their redneſſe. 20 Apples be good in Winter, and prouoke vrine: eate them with a little salt. 21 Tarts of Apples with Annis-seeds, make a sweet breath: a cold rosted Apple eaten to bedward, loseneth the belly. The smell of Basill comforteth the braine, but it hurteth a weake braine. The seeds are gathered in July. 4 The leaues sodden and drunke, do take away the swimming of the head, and so doth the hearbe steeped a night in wine and drunke: The hearbe sodden in wine, doth cause a pleasant smell, heateth a cold stomake, and helpeth digestion. 5 The powder of the hearbe drunke with the iuice of Sloes eight dayes together, doth helpe an outward rupture. 5 Seethe the hearbe in water, and foment the matrix therewith, to cleanse it and draw downe the termes. To cause deliuerance, and bring downe the secondines, drinke the iuice of Basill. 6 Seethe Basill in wine and oyle, and apply it to the fundament to ease the often desire to go to the stoole. 7 Boyle it in raine water, and drinke it with a little powder of the iuice of Sloes to helpe the flixe comming of cold. Belly bound and windie, drinke the seeds. 8 Drinke the seeds in wine to auoide all melancholy sadnesse, and to cause boldnesse and mirth. 9 Basill helpeth the stomacke, digesteth hard meats, and is good for the heart and liuer. Lungs inflamed, stampe Basill with Barley meale and vineger, and apply it outwardly. 10 Braine and nose stopt, and to purge and stay reumes, smell to Basill. Eyes mistie and running, drop in the iuice, or eate the hearbe. Vse it in sessions for womens griefes, as Pentroyall, and Mints, &c. 12 Séethe it in wine with Spikenard, and drinke it against dropsies, winds, flegmes, coldnesse of the heart, and hardnesse of the stomake. Smell to it to comfort the braine and heart: but the vse of it in meats decayeth the sight. Eyes paine, stampe it with wine, and apply it. Eyes dull, and reumaticke, and running, drop in the iuice. 15 Swoning and faintnesse, smell to the hearbe with vineger. Frensie, smell to the hearbe to prouoke sléepe. 18 Cheries eaten before meat, loosen the belly very gently, but they nourish but little, and are hurtfull vnto moyst and vnhealthy stomackes, especially the small Cheries, which do often breed Agues, and other maladies. 19 The red sowre Cheries do likewise loosen the belly, and are more wholesome and conuenient for the stomacke, for they do partly comfort, and partly slake thirst. 20 The blacke sowre Cheries do strengthen the stomacke more then the rest, and being dryed, they stop the laske, 21 The gumme of the mazer or wilde Cherytree, of the Spanish Chery, and our common sowre Cherytree is good to be drunke in wine for the grauell and the stone, and excoriation of the throat, lungs, and breast, the cough and hoarsenesse. 22 The water distilled of the fresh and new gathered Cheries, is good to be powred into the mouthes of them that haue the falling sicknesse, as often as the course of the fitt doth trouble them. 23 Cheries breed good blood, cause appetite, cut flegme and grosse humors, expell vrine, and soften the belly, being eaten when they are fresh: and being condited with sugar, they are good for them that be sicke of inflammations and extreame heats. 24 And being dryed in an ouen, they are good against all fluxes. 25 The distilled water of the wilde blacke Cheries, is good for them that haue lost their speech. 26 The gumme dissolued in wine, is good for the old cough. 27 Tart Cheries be more wholesome then sweet, and eaten before meat, they mollifie the belly, and prepare digestion, and are most excellent in hot burning choller, and are good also after meat. 28 The gumme sodden in Wine and drunke, helpeth old coughs, causeth good colour, sharpeneth the sight, helpeth digestion, and cleanseth out grauell from the reines. 29 The stones breake the stone, if they be eaten dry, or made milke. Preserued Cheries and Plummes, are without danger: but beware of surfetting by Cheries raw.

Figges.

Figs new gathered, nourish more then other fruits, but they bréed winde, & loosen ỹ belly gently, abate heat, quench thirst, but taken of too much, they hurt the stomacke, and make it weake, and without appetite. 2 Dry Figs nourish better then grene and new, yet they bréed no good blood, for they that eat them much, become lowse and full of vermine. 3 Figs eaten before meat loosen the belly, are good for the kidneis, and drive forth gravell with the vrine. 4 They provoke sweat, and thereby expell stinking humors, and therefore are good for young children for the small pocks, measels, and wheales, to bring them forth spédily without perill. 5 They are good for the throat and lungs, the cough, shortnesse of breath, to voide flegme, &c whether they be taken raw, or rosted, or sodden with hysope and drunke. 6 Bruised inward, séethe them in water, and drinke it to mitigate the paine. Stampe them with salt rue, and nuts, and vse it to withstand all poyson, venome, and corrupt ayre. 7 For hoarsenesse, sharpnesse of the throat, all swellings, and impostumes of the mouth, throat almons, sawes, and swellings of the tongue, gargarise, with the decoction of Figs, or hold it in the mouth. 8 For ache of the téeth and sawes, hold Figs in thy mouth. 9 Apply them with wheaten meale to soften and ripen impostumes and angry swellings behinde the eares, especially with Linséd and Fenegreke put thereto, but the roots of Lillies put thereto, ripeth and breaketh impostumes and botches: with Barley meale, they scatter and consume swellings. 10 Sodden in Mosmewood wine with Barley meale, and applyed to the belly, they are good for the dropsie. 11 Stampe them finely with Mustardséd, to helpe the ringing noyse and sound of the eares, and mend the hearing, being applyed outwardly. 12 Dryed Figs soften, consume and make subtill, and may be very well vsed both inwardly and outwardly, to ripen and soften impostumes, and dissolue them. 13 Kings evill, swelling, kernels in the throat, and all other tumours, stampe the leaues finely, and apply them. 14 The milkie iuyce helpeth all deformities of the skinne, Leapres, spreading fores, Tetters, small Pockes, Measels, Pushes, Freckles, Lentiles, and such like scurfe and spots of

the body and face being laid to with parched Barly meale, and with fat or greafe, it taketh away Warts, it cureth the tooth-ache, being applyed with Bombafe or Cotten, or a little pellet made thereof, and put into the hollow tooth. It openeth the veines of the Emerods, and looſeth the belly being applyed to the fundament, and ſo do the leaues if they be put into the fundament. 15 It is good to be applyed with meale of Fenegreke and Vineger vpon the hot gout, eſpecially of the feet. The ſame iuyce is good to be put into all venemous bitings of Serpents and mad dogges. 16 The ſame turneth milke, and cauſeth it to curde. 17 The aſhes of a Figge-tree mixt with oyle and ware, cureth burnings. 18 And lee made with aſhes of the Figge, healeth ſcuruineſſe and feſtered foule fretting ſores being waſhed therewith. Dod. 19 Head ſcurfe, ſtampe the leaues and branches, and ſtreine them with water and a little vineger, and anoint therewith. 20 Roſt three Figs, and ſéethe them in a cup of Béere with ſome braſed Licoras, and Anniſéeds, and kéepe it warme by the fire, and drinke thereof warme to bedward and eate the Figs, and ſo it helpeth the cough in thrée nights. 21 A little of the wood of the tree put into a pot, maketh the meat to be ſoone ſodden. 22 Stampe a handfull of Figs, till the kernels be broken, and temper them with a little freſh greaſe, and apply it to a ſore breaſt as hote as the woman may ſuffer to auoide the ſwelling and paine. 23 Rub Warts with Fig-tree leaues, and bury them, and the Warts will go away. 24 Séethe Figges in wine with hyſope and ſtreine it, and drink it to help the griefes of the throat, lungs, and old rotten coughs. 25 Figs be good againſt melancholy, and the falling ſickneſſe. Quince.

QVince: The Quince stoppeth the laske or common flure, the bloudy flure, and all other flures of bloud, spitting bloud, especially when it is raw: for when it is either boyled or rosted, it stoppeth not so much, but it is then fitter to be eaten, and more pleasant to the taste. 2 Women with childe that eat Quinces often in meat, or otherwise, shall bring forth wise children of good vnderstanding. 3 The Codenac, or Marmalad made with hony as it was wont to be, with Sugar as they vse to make it now adayes, is very good to strengthen the stomacke, and to keep the meat therein till it be perfectly digested. 4 Being taken before meat, it stoppeth the laske, and after meat it loseth the belly, and closeth vp the mouth of the stomack so fast ỹ no vapors can ascend vp into the braine, & cureth headach, that commeth

commeth of such vapours. 5 The decoction or broth of Quinces hath ỹ like vertue, & stoppeth the belly, & all fluxes of blod, and the violent issues of the terms. 6 With ỹ same it is good to bathe the lose fundament & falling downe of the matrix, to make them to returne into their naturall places. 7 They are also good in plasters to stop the flure & vomiting, & for all hot swellings & inflammations of the breast & other places. 8 The downe that groweth upon Quinces sodden in wine & applyed, healeth carbuncles. 9 The ople of Quinces stayeth vomitings, gripings in the belly or stomach wt the casting up of blod, if the stomach be anointed therwith. 10 The flowers of the Quince tree do stop fluxes, spitting blood, and the flowers, & have the same vertues that Quinces themselues have. 11 If the stomach bee very hot and moyst, or the belly laxative, Quinces are best to bee eaten before meat, being rosted or eaten cold, & the tarter that they be, the better they are. 12 And Pomegranates be of the same vertue. 13 But the custome of taking of Quinces in meats hurteth ỹ sinewes, but by way of medicine they be excellent. 14 And the cores taken out and preserued in hony or kept in their mucilage, they may long continue to ỹ use of rosting or baking: for they be perilous to the stomach being eaten raw, but preserued, they doe mightily preuaile against drunkennesse. 15 If hee that hath drunke well eate a Quince rosted or otherwayes ordered, the drinke shall not annoy his braine much. 16 Quinces well rosted or baked, are of good nourishment, and are good for the stomach, and take away belching, vomiting and lothing, especially taken after meat. 17 The syropes and Electuaries made of Quinces with spices, are very profitable for many griefes. 18 The iuyce of a raw Quince is very good for them whose winde is stopt, and cannot hold their meat. 19 Quinces preserued whole in hony, are very good to bee vsed of them that haue the bloody flure. 20 Raw Quinces applyed in plasters are good to stop the flure and vomiting, the heat of the stomach, and inflammation of the breast and liuer. 21 The decoction of the leaues is good against the falling downe of the matrix and fundament. 22 The seed steped in Rose-water, is good against thick and grosse humors in burnings with fire. 23 Gawles and Medlers be of the same vertue. 24 No man can sufficiently declare the vertues of Quinces. 25 Quinces are good for the stomach,

they make a man pisse well, but when they are rosted, they are counted to be gentler. 26 The iuyce of raw Quinces is good for them that are short winded. 27 The broth of them is good to bathe the mother in that falleth downe. The Quinces that are condited with hony prouoke vrine. 28 They that are sodden in hony, are more pleasant for the stomach. 29 They are good raw in plasters to stop the belly, for the inflammation of the stomach and paps, for vomiting, hardnesse of the milt, and swelling about the fundament. 30 You may make wine of them, by stamping and streyning them, but it will not last, except you put to euery xb quarts one quart of hony, for without hony it will turne to vergis. 31 The wine so made is good for all the things aforesaid. 32 The oyle of Quinces is made of the smallest, roundest, and best swelling Quinces. 33 The flowers both grene and dry, are good in emplasters for all things that ned binding, and for inflammations, and vomiting of blod. 34 And they are also good against the flixe, and to stop the termes. 35 Headach, eat rosted Quinces after meales when the ach commeth of vapours. 36 Vomit to stop, steepe the kernels in water and drinke it, or binde the leaues vnto thy wrists. They may be gathered in August, and kept all the yere. 37 Flixe, seethe Quinces after they be pared and cored with Apples & Cinamom, and sugar it, and take thereof iii nights. 38 To make Marmalad of Quinces, take Quinces xbi pound, core them, seethe them, and stampe them in a stone morter, then clarifie ten pound of hony with the gleyre of an eg, or white well beaten, and seethe all till it be stiffe, then lay it on a marble stone, and cut it of what fashion you will. 39 A plaster of Quinces is restrictiue and good for the bloody flixe. 40 Tongue sharpe and dry, put the sedes of Quinces, and Psilium, or one of them into a cloth, & steepe it in water, and wash therewith. 41 Stamp Barly meale with halfe as much Quince kernels with vineger, and apply it to burnings or inflammations of the gout. 42 Mixe the pap of sodden Quinces eight ounces, with powder of Sugar foure ounces, vineger fiue spoonefull or more, Ginger halfe an ounce, white Pepper one dramme, seethe it to the height of a Conserue, and take thereof before and after meat to comfort the stomach.
